PODCAST | Reality at the smallest scale: What is quantum physics and why should you care?

Tuesday, August 22, 2017

Author(s)

Eric Breckenfeld

“Quantum physics” is often viewed in popular culture as being entirely incomprehensible. STPF fellows Eric Breckenfeld and Jonathan Trinastic speak with three physicists from government, academia and industry to discuss the phenomena studied in quantum physics and its relevance to our daily lives. One budding technology is quantum computing, an area of significant interest at IBM where users are permitted to submit code to their 5-qubit quantum computer at: https://quantumexperience.ng.bluemix.net/qstage/#/user-guide

PARTICIPANTS

Host: Eric Breckenfeld (https://pfellowsqaweb02.aaas.org/user/29069/profile), Ph.D. Materials Science and Engineering, 2016-2018 Executive Branch Fellow at the National Nanotechnology Coordination Office
Interviewer: Jonathan Trinastic (https://pfellowsqaweb02.aaas.org/user/29197/profile), Ph.D. Physics, 2016-2018 Executive Branch Fellow at the Department of Energy

Gabe Perez-Giz (https://www.aaaspolicyfellowships.org/user/30242/profile), Ph.D. Physics, 2015-2017 Executive Branch Fellow at the National Science Foundation

Dmitri Kilin, Ph.D. Physics, Assistant Professor at North Dakota State University

Nick Bronn, Ph.D. Physics, Research Staff Member at IBM TJ Watson Research Center

PRODUCERS

Eric Breckenfeld, Ph.D. Materials Science and Engineering, 2016-2018 Executive Branch Fellow at the National Nanotechnology Coordination Office

Alejandro de la Puente (https://pfellowsqaweb02.aaas.org/user/29186/profile), Ph.D. Physics, 2016-2018 Executive Branch Fellow at the National Science Foundation

EXECUTIVE PRODUCER

Carlos Faraco (https://pfellowsqaweb02.aaas.org/user/29163/profile), Ph.D. Neuroscience, 2016-18 Executive Branch Fellow at the National Institute of Justice
