
PODCAST | Bringing Home Americans Stranded Abroad due to COVID-19

Wednesday, August 4, 2021

Author(s)

Chris Parsons

Dr. Ambika Bumb is a Science & Technology Policy Fellow working in the Crisis Management and Strategy Office at the U.S. Department of State. Within this office, she was part of several task forces that played major roles during the coronavirus pandemic, including the Repatriation Task Force that brought home American citizens stranded abroad during the early months of the pandemic. This repatriation effort was unprecedented in many ways but was executed quickly and efficiently. For their work, the U.S. Senate passed a bipartisan resolution commending the Crisis Management and Strategy Office and the Department of State presented with the Distinguished Honor Award. In this episode Dr. Bumb talks about the challenges that she and her colleagues faced while bringing Americans home, and about how diverse parts of her academic and professional life

seemed to converge in her work at the Department of State.

Participants

Ambika Bumb, Ph.D., 2019-20 Executive Branch Fellow at State Department
