Symposium: Global Health Diplomacy

Past, Present & Future

Description

You are cordially invited to attend the symposium, **Global Health Diplomacy - Past, Present, and Future**. This symposium is being presented by the Science & Technology Policy Fellowships Affinity Group: Science Diplomacy.

Over the last century, responses to health crises have progressively shifted to encompass the global community. Effective responses to current and emerging health issues will require coordinated efforts across

countries and communities, which can only be achieved by building collaborative foundations and strong diplomatic ties. Join invited experts and the AAAS Science and Technology Policy Fellowship community on the journey from the past to the present of global health diplomacy, to understand how scientists, health professionals, and diplomats will collaboratively address the global health challenges of the future!
